AUTUMN PLANTING

THE ELM CITY NURSERY CO.
NEW HAVEN, ~ ~ CONN.

Autumn Planting

PLANTING permanent trees and otherwise expending thought, time and money in connection with garden-work, either artistic or practical, or both, is too serious a matter to leave for the *Spring planting impulse*. Best results are gained where such problems are taken up during the Summer and early Autumn, careful preparation of soil, etc., arranged for, and if plantings are made under the favorable conditions of early Autumn few failures need follow. What a satisfaction, when the garden-rush of Springtime does come to feel that the more serious parts of ones plantings have already been made and that they are ready to grow on without the set-back that Spring planting must necessarily involve. We cannot too strongly recommend AUTUMN PLANTING.

DESCRIPTIVE CATALOG

Our Descriptive Catalog should be in the hands of everyone who is interested in *high grade* nursery stock, especially for Autumn planting. We have had a large edition of these catalogs printed so as to have plenty for distribution. We will be glad to promptly send a copy to you on receipt of request, also to any of your friends who you believe will be interested.

OUR NURSERIES

You are cordially invited to visit our Nurseries (*see HOW TO REACH US on page 7*). Many acres are here devoted to the developing of fine *SPECIMENS* of the many choice Evergreens, Shade-trees, Shrubs, Vines, etc., which are so useful in general Landscape-work, also large Fruit-trees (*fruiting sizes*) for the orchard and garden. By using this extra large stock the planter can plant into his grounds fine Specimens which will give immediate results with perfect success. These fine specimen-trees have been frequently transplanted, root pruned and kept in the best possible condition. We also have the smaller sizes for those who have plenty of time to wait and are not anxious for early results. A judicious mixed planting of the larger and smaller sizes of ornamentals will often produce very attractive results. One should visit our Nursery and see these fine Specimens and what a great variety of them there is to select from.

Our Descriptive Catalog will be Promptly Sent on Request

THE ELM CITY NURSERY COMPANY

EDGEWOOD, Edgewood Avenue, NEW HAVEN, CONN.

Evergreens and Fruits for Autumn Planting

Our collection of Choice Evergreens is not only extensive but unique. We have in stock one of the most varied assortments to be found in this country. All of our Evergreens are frequently root-pruned and otherwise cared for so as to be in the best of condition for transplanting. Many fine specimens of *extra large* size for immediate effects are available. We cannot too strongly recommend Autumn planting for this class of stock, especially where plants are taken up with balls of earth.

BROAD-LEAVED EVERGREENS.—Beautiful Rhododendrons, Mountain Laurel, Andromedas, etc., can be taken up with balls of earth. We have a very extensive stock of large and medium sized plants to offer at the Nursery, as well as splendid facilities for the collecting of these plants from their native hillsides. As an example of success in Fall planting of Broad-leaved Evergreens, we will be pleased to show you a hillside section of our Nursery where about 4,000 collected Rhododendron Maximums were planted last Fall as late as November, and not one per cent. has failed to grow.

FRUIT TREES.—We have succeeded in getting up a large stock of EXTRA SIZED Fruit-trees of *bearing* or *near bearing* grades. Also Grape-vines of fruiting sizes so that immediate results can be procured. These *extra large* specimens can be transplanted successfully.

Pot Grown

STRAWBERRIES, POT GROWN

If pot-grown Strawberry plants are set out in well prepared ground any time before freezing weather they will produce an abundant crop of luscious berries the following Spring. Inquire for our *latest list* of varieties and prices. Plants are now ready. The earlier planted the better.

OUR DESCRIPTIVE CATALOG.—We have just published an extra large edition of our catalog and will be pleased to send you a copy promptly on request. This will not only assist you in placing orders but is a splendid reference book. It has been prepared with great care and accuracy and the classification can be depended upon.

EDGEWOOD, Edgewood Avenue, NEW HAVEN, CONN.

Deciduous Trees For Fall Planting

There seems to be a prevailing impression among inexperienced planters that it is necessary to wait until the leaves fall or after a severe frost before planting Deciduous-trees. Practical experience demonstrates that this is not the case. In fact, by a little extra care in stripping the foliage any time after September 15th deciduous stock can be transplanted with uniform success. To those looking for Fine-specimens and Extra-large Stock for general planting as well as Avenues, etc., our extensive stock will prove especially valuable. Individual plants of Special sizes and Shapes can be selected at the Nursery any time between now and planting time, tagged and reserved for later shipment. Intending purchasers are always welcome at the Nursery.

CHECK LIST

Our descriptive catalog lists with kinds, sizes and prices the many varieties listed below.

DECIDUOUS TREES

Acacia	Gymnocladus	Plums
Acer	Halesia	Poplar
Aesculus	Hamamelis	Populus
Ailanthus	Honey-locust	Prunus
Andromeda	Hop Tree	Ptelea
Aralia	Hornbeam	Pyrus
Ash	Horse Chestnut	Quercus
Bass-wood	Japan Maples	Quinces
Beech	Judas Tree	Red Bud
Betula	Juglans	Robinia
Birches	Koelreuteria	Salisburia
Button-ball	Larch	Salix
Carpinus	Larix	Snowdrop Tree
Catalpa	Linden	Sophora
Celtis	Liquidambar	Sorbus
Cerasus	Liriodendron	Sorrel Tree
Cercis	Locust	Sour Gum
Cercidiphyllum	Magnolia	Stuartia
Cherries	Maiden-hair Tree	Sweet Gum
Cladrastis	Maple	Sycamore
Coffee Tree	Morus	Taxodium
Cork-tree	Mountain Ash	Thorns
Cornus	Mulberry	Tilia
Crabapple	Nettle Tree	Tree of Heaven
Crataegus	Nyssa	Tulip Tree
Cypress	Oak	Tupelo
Cytisus	Oxydendron	Ulmus
Dogwood	Pagoda Tree	Virgilia
Elm	Paulownia	Walnuts
Fagus	Peaches	Willows
Fraxinus	Phellodendron	Witch Hazel
Gingko	Plane	Xanthoxylum
Gleditschia	Platanus	Yellow Wood

Our descriptive catalog will be sent promptly on request. We will also greatly appreciate it if when writing for catalog you will be so kind as to give us the names of those whom you believe will be interested as we would like also to send them a copy.

Deciduous Shrubs, Vines and Roses for Fall Planting

The usefulness of Deciduous-Shrubs and Vines for decorative planting is generally appreciated. The variety now available at any large Nursery gives opportunity for unlimited opportunities. The planter need not wait for little plants to grow up to gain results as we have done the waiting on a large scale and have quantities of large, developed Shrubs and Vines ready for immediate effects. Many of these fine large specimens can be removed with large balls of earth and garden-effects produced which have the appearance of having been established for many years. Do not delay important plantings until Spring-time, but get them well established in the Autumn which is really the best season of the year for doing this special class of work.

CHECK LIST

EDGEWOOD, Edgewood Avenue, NEW HAVEN, CONN.

Hardy Herbaceous Perennials For Autumn Planting

The really charming Flower-gardens are the ones freely supplied with a judicious arrangement of the Hardy-perennial-Plants. They also have an additional charm and value in re-appearing from year to year. Many ferns will remain for many years without replanting. Other kinds, while quite hardy, need re-setting from time to time to get best results.

PAEONIES, IRIS, PHLOX, LARKSPUR, HOLLYHOCKS, ETC., are among the good old standbys for the Herbaceous-garden. There are many others equally attractive but less well known. *Autumn-planting* of practically all the Hardy-herbaceous-Plants is to be recommended. This gives the plants an opportunity to become so well established that they start into a normal and undisturbed growth the following Spring. Conditions important where best results are to be anticipated.

CHECK LIST

Consult our general catalog for description, sizes and prices.

HARDY HERBACEOUS PLANTS

Achillea	Coral Lily	Hemerocallis	Pumila Iris
Aconitum	Coreopsis	Heuchera	Pyrethrum
Adam's Needle	Coronilla	Hibiscus	Ragged Robin
Aegopodium	Creeping Jenny	Hollyhocks	Ranunculus

OUR DESCRIPTIVE CATALOG will be promptly mailed on request. All who are interested in choice trees and plants are cordially invited to visit our Nursery. The collection of rare Japanese dwarf plants is alone well worth a long journey to see.

THE ELM CITY NURSERY COMPANY

EDGEWOOD, Edgewood Avenue, NEW HAVEN, CONN.

Nursery Department

Every garden area, however large or small, presents its opportunity for attractive effects.

We grow and supply the best grade of nursery stock the market affords. Our facilities are very complete, every department being under efficient management. That our methods are meeting with popular favor is evidenced by the rapid growth our business enjoys. By purchasing from our Nurseries you are guaranteed *High Quality* stock. It is grown under most favorable conditions, dug and packed by skilled and careful workmen. Our nursery stock can be depended on to produce maximum results when planted under favorable conditions. The Nurseries are open to the public every day of the year, but positively no business will be transacted Sunday.

Landscape Department

Where *best* results are anticipated in Landscape and other Gardening work experience is a most important factor. Our landscape department is under well equipped and expert management. We are glad to offer suggestions without charge to intending purchasers, but where landscape problems require special visits, plans, specifications, etc., a charge is

made consistent with value of services rendered. We will be pleased to take up this matter more fully with those who are interested. Ample reference from those who have employed us.

Send for our Cross-Section *Sketch-sheet* blank. By filling it out and returning it to us we can offer you valuable suggestions for which there will be no charge.

Important Landscape Problems.

It is seldom advisable to attempt to hurry through important landscape problems. Time enough should be given to work out an original idea, thoughtfully get into shape necessary sketches, drawings and specifications so that work can proceed methodically and therefore economically.

Gardening Department

We maintain a force of competent gardeners who can execute gardening work in a thorough and practical manner. Pruning and otherwise caring for established trees, vines, etc., is a special feature of our work, and one that an owner can afford to put into experienced hands only. Many trees whose worth cannot be counted in dollars, which are perishing from neglect, can be restored to health and given a new lease of life if given proper treatment.

We can refer to many satisfied clients who have approved our planting plans, procured their stock from us and employed us to carry out the work.

HOW TO REACH US.

TAKE EDGEWOOD CAR DIRECT TO NURSERY FROM RAILWAY STATION OR TRANSFER FROM OTHER LINES.
